# WI ePDMP Components

## •Clinical Decision Support Tool

- Patient Prescription Histories
- Prescribing, Treatment, Dispensing Decision Support

## Interdisciplinary Communication Tool

- Law Enforcement Alerts
- Law Enforcement Investigations

## •Prescribing Practice Assessment Tool

- Prescriber Metrics Report
- Medical Coordinator Access

## •Public Health Tool

- Interactive Statistics Dashboard
- Dispensing Data Trends (State- and County- Level)

# Legislation

## Initial Legislation 2010

• *Implemented 2013*

- Required creation of a PDMP
- Collect dispensing data for monitored prescription drugs dispensed in WI
  - Controlled substances in Schedule II through V
  - Ability to add drugs with substantial potential for abuse
- Pharmacies required to submit within 7 days of dispensing

## HOPE Legislation 2015

• *Implemented 2016/2017*

- Dispensers required to submit to the PDMP by the end of the next business day
- Expanded access for healthcare
- Creation of Medical Coordinator role
- Law enforcement/prosecutorial units
  - Duty to Report
  - Access without a court order
- Prescribers required to review PDMP prior to prescribing a monitored prescription drug

# Expanded Access

- Professions that Treat Substance Abuse
- Registered Nurses
- Medical Coordinator

- **Professions that treat substance abuse as part of scope of practice**
- DSPS License types
- Clinical Substance Abuse Counselor
- Substance Abuse Counselor
  
- DSPS License with specialty designation
- Social Worker: Advanced Practice, Independent, Licensed Clinical
- Licensed Marriage and Family Therapist
- Licensed Professional Counselor

# Exceptions to Review

Review PDMP before the practitioner issues a prescription order for the patient unless:

- The patient is receiving hospice care.
- Order is intended to last 3 days or less and is not subject to refill.
- Drug is lawfully administered to the patient.
- Due to emergency, it is not possible to review the PDMP.
- PDMP is not operational or other technological failure.

# PDMP Utilization by Healthcare Users

## Daily Patient Queries

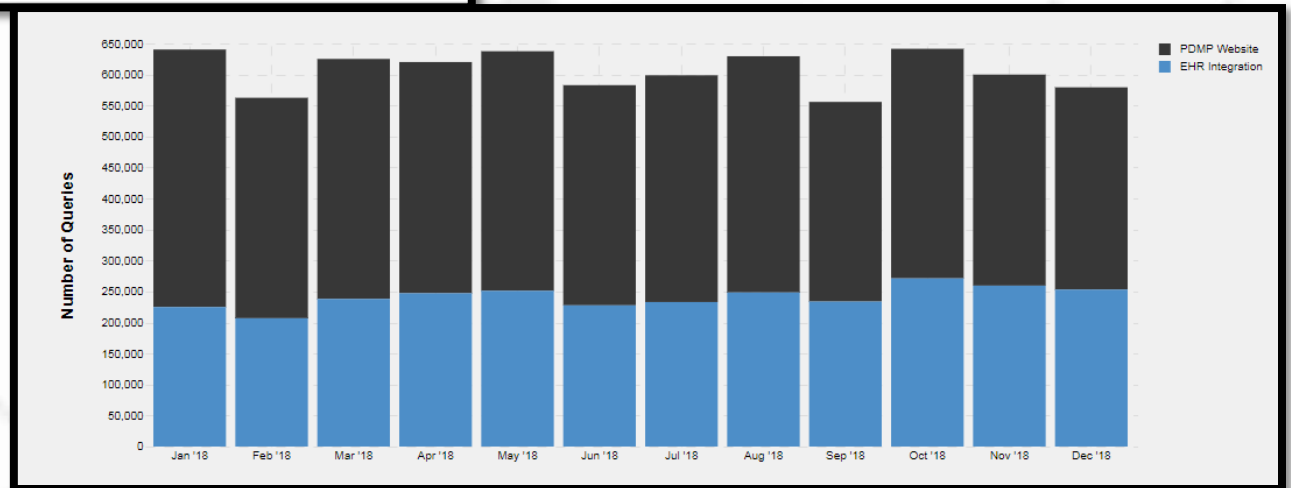

December 2016: 4,800 queries  
 August 20, 2018: 32,800 queries

## Monthly Patient Queries

January 2017: 101,000 queries  
 October 2018: 641,400 queries

## EHR Single Sign On

- 16 health systems
- Over 40% monthly queries from SSO

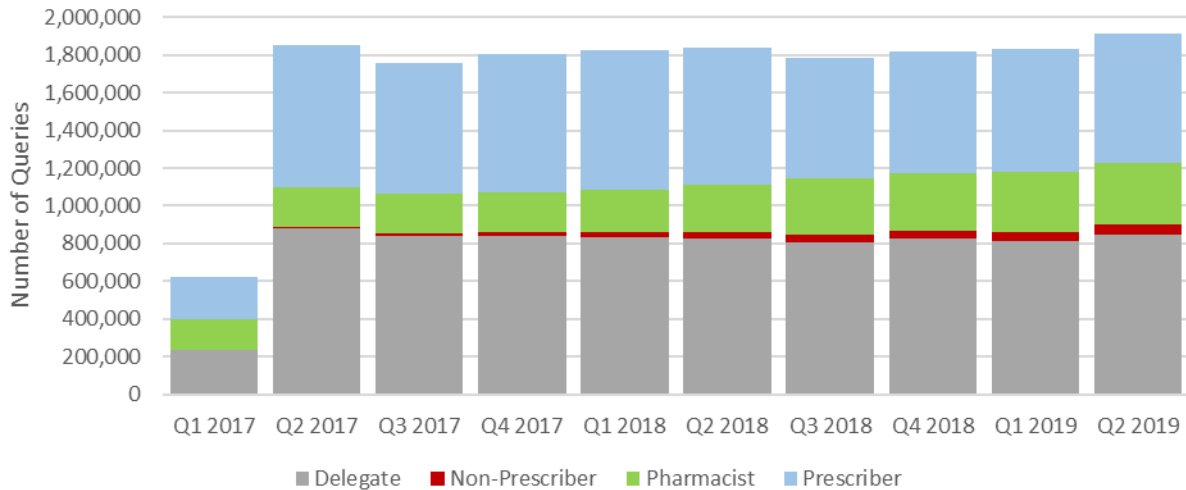

# User Queries

**Figure 7. Patient Queries by Healthcare Professionals**

**Figure 9. Queries by Non-Healthcare Account Type**

# PDMP Dispensing Data

# Dispensing Data Overview

- If licensed in WI, must submit daily to PDMP or request waiver
- 5 days to correct records that failed to load due to errors
- Approximately 2,000 pharmacies submitting
- Average of 700,000 records per month

# Dispensing Data Inclusions/Exclusions

## Includes:

- Controlled substances in Schedules II-V
- Dispensing Practitioners
- Veterinary dispensings filled by a pharmacy
- Mail order pharmacy dispensings
- Veterans Affairs pharmacies in WI

## Excludes

- Monitored drugs administered directly to a patient
- Monitored drugs dispensed at veterinary clinic
- Dispensing by federally funded opioid treatment programs
- Department of Defense pharmacies
- Diagnosis code

# Dispensing Data

## Wisconsin Addiction Resources x

### Prescribers

**The University of Wisconsin Addiction Consultation Hotline** provides real-time support and expertise for healthcare professionals from specialists in addiction medicine, addiction psychiatry, psychology and AODA counseling. The hotline is available weekdays from 8 a.m. to 5 p.m. Providers should call the UW Health Access Center at 608-263-3260 for assistance. Those outside of Madison should call toll-free: 800-472-0111.

**Project ECHO® (Extension for Community Healthcare Outcomes)** is a statewide educational teleECHO initiative that connects clinical experts with primary care providers and medication assisted treatment prescribers across Wisconsin in an effort to reduce opioid-related complications. Via a regularly scheduled videoconference, a multidisciplinary panel of specialists provide education and lead a collaborative discussion on submitted patient cases. Visit [Wisconsin's Opioid Project ECHO](#) for more information or to register for an upcoming session.

### Patients and Family

**The Wisconsin Addiction Recovery Helpline** is available to connect people with resources to overcome dependence on opioids or other substances. This free and confidential service supported by the Wisconsin Department of Health Services (DHS) is managed by 211 Wisconsin. Individuals can call 211 to be connected with local treatment and recovery resources.

# Data Driven Alerts

WI ePDMP uses sophisticated data analytics to assess a patient's controlled substance prescription history

1. Multiple Prescribers or Pharmacies  
*5 or more in the last 90 days*
2. High Current Daily Dose of Opioids  
*Exceeds 90 morphine milligram equivalent (MME)*
3. Concurrent Benzodiazepine and Opioid  
*Active prescriptions for both drugs*
4. Long-Term Opioid Therapy with Multiple Prescribers  
*1 opioid or more from 2 or more prescribers for more than 90 days*
5. Multiple Same Day Prescriptions  
*Same controlled substance drug from multiple prescribers or pharmacies on the same day*
6. Early Refill  
*Filled 2 or more days earlier than expected*

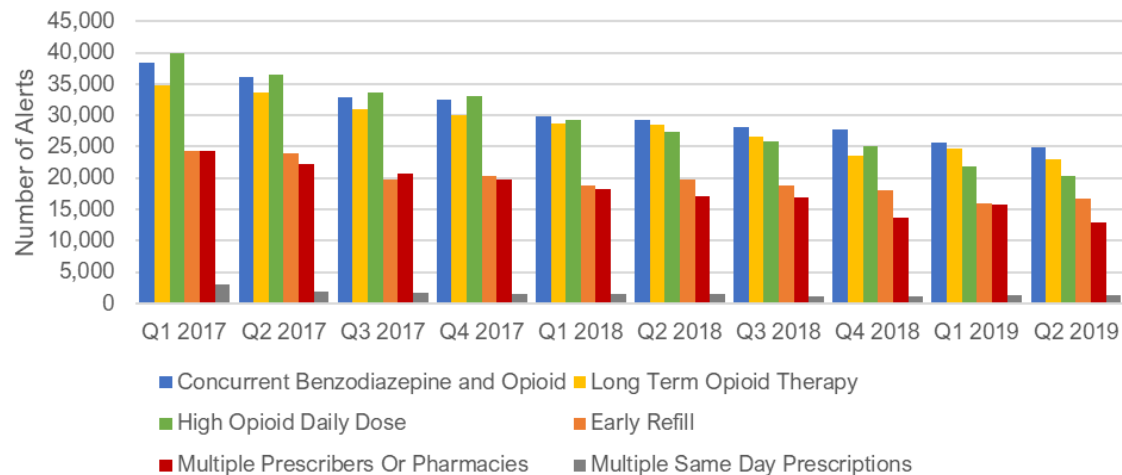

# Alert Trends

## Concerning Patient History Alerts Listed by Volume of Alerts Generated in Q4 2018

	Alert Type	Q1 2017	Q4 2018	Percent Change
1	Concurrent Benzodiazepine and Opioid	38,446	27,742	-28%
2	High Opioid Daily Dose	40,005	25,094	-37%
3	Long Term Opioid Therapy	34,819	23,588	-32%
4	Early Refill	24,354	17,988	-26%
5	Multiple Prescribers or Pharmacies	24,379	13,645	-44%
6	Multiple Same Day Prescriptions	3,009	1,038	-66%

## Morphine Milligram Equivalent

### Total Opioid Daily Dose and Opioid-Benzodiazepine Concurrence for the Past 100 Days

According to the CDC, calculating the total daily dose of opioids helps identify patients who may benefit from measures to reduce risk of overdose. Concurrent use of benzodiazepines and opioids can place an individual at an increased risk for severe respiratory distress that can lead to overdose death. On the chart below, the line indicates the patient's cumulative daily dose of opioids and the red shading indicates when the patient had concurrent opioid and benzodiazepine prescriptions.

The total daily dose of opioids is calculated using the morphine milligram equivalent (MME) conversion values from the national Prescription Drug Monitoring Program Training and Technical Assistance Center at Brandeis University. The federal centers for disease control and prevention provides more information about the importance of MME calculations in calculating total daily dose.

# Prescribing Practice Assessment

# Dispensing Metrics

The charts below display individual prescriber metrics for the last 100 days compared to other prescribers within the same specialty.

# Alert and Usage Summary

## Concerning Patient History Alerts

Generated during the past 100 days

- 1 Patients with Concurrent Benzodiazepine and Opioid Prescriptions
- 5 Patients with Multiple Prescribers or Pharmacies
- 4 Patients with Early Refill
- 0 Patients with High Current Daily Dose of Opioids
- 1 Patients with Long-Term Opioid Therapy with Multiple Prescribers
- 1 Patients with Multiple Same-Day Prescription or Dispensing Events

## Law Enforcement Alerts

Reported during the past 100 days

- 0 Patients with Suspected Non-Fatal Opioid-Related Drug Overdose
- 1 Patients with Suspected Fatal Narcotic Overdose
- 0 Patients with Report of a Stolen Controlled Substance Prescription
- 0 Patients with Suspected Violation of the Controlled Substances Act involving Rx Drugs

## Summary of ePDMP Usage

Based on usage since 9/17/2017

- 60 Queries by User
- 90 Queries completed by Delegates
- 191 Prescription Orders Written (excluding orders for 3-day supply or less)
- 85% Estimated ePDMP Usage Compliance Rate

### USE NON-OPIOID TREATMENT

Opioids are not first-line or routine therapy for chronic pain

In a systematic review, opioids did not differ from non-opioid medication in pain reduction, and non-opioid medications were better tolerated, with greater improvements in physical function.

### REVIEW PDMP

Check PDMP for high dosages and prescriptions from other providers

A study showed patients with one or more risk factors (4 or more prescribers, 4 or more pharmacies, or dosage > 100 MME/day) accounted for 55% of all overdose deaths.

### OFFER TREATMENT FOR OPIOID USE

Offer or arrange evidence-based treatment for patients with opioid user disorder

(e.g. Medication-assisted treatment and behavioral therapies)

### START LOW AND GO SLOW

When opioids are started, prescribe them at the lowest effective dose

### AVOID CONCURRENT PRESCRIBING

Avoid prescribing opioids and benzodiazepines concurrently whenever possible
